ARUNN TECHNOLOGIES

NexWork

Smart Business Management for Manufacturing Enterprises

Purchase · Sales · Outsource

Expenses · Reports

© 2026 Arunn Technologies, Coimbatore

Small manufacturers face big challenges

Manual Records

Bills, payments and ledgers maintained in registers or scattered Excel files

No Visibility

Who owes how much? What's in stock? No instant answer without manual search

Costly Software

Enterprise ERPs are expensive, complex, and built for large companies — not small units

INTRODUCING NEXWORK

One software. Everything your business needs.

- ✓ Built specifically for **small manufacturing and job work businesses**
- ✓ **Offline desktop app** — works without internet, data stays with you
- ✓ **Affordable one-time pricing** — no monthly subscription, no hidden fees
- ✓ **Fast and simple** — learn in a day, not weeks of training

Built on

Qt 6 + PostgreSQL

Fast, reliable desktop performance with enterprise-grade data storage

Complete Modules — All in One

Purchase

Suppliers · Bills · Payments · PO

Sales

Customers · Invoices · Payments · Estimates

Outsource

Job Orders · DC · GRN · Bills

Expenses

Headings · Debit · Credit Entries

Reports

Payment Statements · Stock · Ledgers

MODULE 1

Purchase Management

Supplier Management — Maintain supplier profiles with GST, contact and vendor details

Purchase Orders — Create POs with item-wise tracking, delivery dates and status

Bills & Stock Update — Record purchases and auto-update raw material stock

Payment Tracking — Record payments with mode, reference, TDS and net amounts

Payment Statement — Full ledger with opening balance, invoices and payments date-wise

Supplier Rating — Rate suppliers on delivery quality and track performance

MODULE 2

Sales & Invoice Management

Invoice Generation — Auto-numbered GST invoices with CGST / SGST / IGST split

Payment Collection — Record receipts with mode, reference and TDS deductions

Customer Management — Full customer profiles with GST, type (Local / Interstate)

Customer Statement — Invoice-wise and payment-wise ledger with opening balance

Estimates / Quotations — Create and share estimates before converting to invoices

Invoice Settings — Custom prefix, financial year format, starting number control

MODULE 3

Outsource / Job Work Management

Job Orders — Create outsource job orders with item qty, process and expected delivery

Outsource Bills — Generate bills against GRN with GST (CGST / SGST / IGST)

Delivery Challans — Issue DCs with item-wise details, track issued vs received qty

Payment Tracking — Record payments to job workers with TDS and net amount

GRN Entry — Record goods received with quality remarks and supplier rating

Payment Statement — Complete supplier ledger with opening balance and history

Reports & Statements

Know your business numbers instantly — no manual calculation needed

Payment Statements

Purchase · Sales · Outsource — Date-range filter with opening balance, debit/credit and running balance

Stock Reports

Current raw material stock with minimum level alerts and last updated time

Expense Reports

Heading-wise expense summary with debit and credit entries for any date range
